

# SuPrimo - Car Cleaning Instructions

- **You Require**

First you will need a trigger spray bottle to mix your cleaner in. This may be new or a well washed bottle you had something else in. The normal mixture is made up with 30ml of SuPrimo Concentrate to 1 litre of water. Therefore, if you have a half litre bottle just put 15ml of SuPrimo Concentrate in then fill with water.

- **Mixing**

The measure chamber on the top of the bottle is very easy to use. Take the screw cap off of the top of the chamber and leave the other one in place. Gently squeeze the bottle and you will see the chamber fill to the measure mark. Repeat this until you have the correct amount in your spray bottle. Add water to your spray bottle and gently tip upside down a couple of times and the mixture is now ready to use.

- **How to Use**

The best cleaning cloths to use are old terry towels or T-shirts. If you have an adjustable nozzle on your spray bottle, set it to a very fine spray. Using this will mean you use less cleaner yet your spray will cover a larger area. Spray a mist on a small area of your vehicle with the cleaner then with one cloth gentle wipe over the wet area in one direction as if you were mopping up a spill. This will remove the dirt from the area you are cleaning. With a second cloth buff that newly cleaned area to a finished shiny part of your vehicle. Repeat this all over until you have covered all parts of the vehicle.

- **Surfaces to Use On**

SuPrimo works perfectly on all painted areas as well as plastics glass and wheels. Use it to clean the inside of your windows as well as out. You may like to use separate cloths for this so as not to transfer any external grease onto your windows. It works perfectly on dashboards and head linings.

- **Wheels**

One this SuPrimo excels in is cleaning brake dust from wheels. If they haven't been cleaned well for some time you may need to go over them a couple of times. Spray some of the cleaner over there and give them a firm wipe. You will soon see the brake dust start to dissolve and run way like dirty water.

- **To Sum Up**

We have found from our own tests and from our many happy customers that the more you use SuPrimo the easier your cleaning gets as the dirt finds it harder to stick to the surface. For anyone that is a regular car cleaner this is perfect as the time you will spend cleaning will be reduced. Many driving professionals are using SuPrimo like taxi drivers and chauffeurs use it quickly between jobs to make sure their vehicle is kept perfectly clean and ready for the next job.
